Fine Hogs.

Last Saturday W. R. Davis, that
estimable gentleman and friend of
the Jimp, folks, presented us with
a nice mess of chitterlings from a
fine 325 pound hog. Mr. Davis
said he had killed two hogs weigh-
ing 325 pounds each, and had more
to kill Christmas, and later on in
January. He always raises his own
meat and more. If every one did
this there would not be so much
meat shipped in from the packer-
ies. To say we enjoyed that mess
of chitterling is not half expressing
it.

Three Inches of Sleet.

The first heavy fall of sleet be-
gan Friday night and continued
most of the night, with some rain
and by Saturday morning the fall
was three inches or more, and it is
still cloudy, with indications of
more sleet or snow. The ground
is white with this hominy sleet,
but it is not cold enough to freeze.

ent. He will discuss needed re-
forms in school work.

To the Business Men.

The rest room has opened its
doors for the comfort of the trading
public and we believe it will be
not only a great convenience to
visitors, but a source of benefit to
the business men who so gener-
ously subscribed for its main-
tenance. The committee tried to
see all parties who they thought
would be interested, but in the
three rounds that they made failed
to find a single number. Any one
wishing to subscribe may do so by
calling at Rogers National Bank,
where they will see the list. The
names of those who maintain the
rest room will be placed in a con-
spicuous place on its walls, where
all friends and visitors can see
them.

CHRISTMAS 1909

Will soon be here. It is the
principal Holiday when all
men like to turn out in new
Clothes. Have you put in
your order for a Suit? If not
do so at once as the time is
short, and a rush work will not
please you. To tailor gar-
ments properly requires ample
time to do the work. While I
can get your suit in seven
days, would far rather have
10 or 12. Don't delay but
come right along and pick out
your selection before the pret-
tiest patterns are sold out.
I will fit and please you or
your money back.

ELECTION ORDERED

The Commissioners Court of
Marion county met in special ses-
sion this, Saturday morning, De-
cember 18, 1909. Judge R. A.
Loomis, Commissioners Geo. W.
Brown and A. D. Craver, present.
An order was granted for an elec-
tion for Precinct No. 3, Marion
county, including Jefferson, for a
prohibition election, the date set
for Tuesday, January 11, 1910.

A Mothers' Club.

A call for the women interested
in the upbuilding of the Jefferson
Public School was answered by a
meeting of seventeen Friday after-
noon, December 3rd. A mothers'
club was organized with 17 mem-
bers. Mrs. J. C. Rowell, Jr., was
elected president; Mrs. D. M. Smith,
vice-president; Miss Alice Emmert,
secretary and treasurer. Ten cents
per month is the amount to be
paid by each member. The next
meeting was held Friday, Decem-
ber 10th at 3:00 p. m. Committee
were appointed and plans suggest-
ed to meet the most urgent needs
of the club. We ask that all
charter members be present, also
cordially invite every woman who
is interested in school work,
whether patrons or not, to join us.
We need your help. The follow-
ing became members:

Mrs. J. H. Rowell, Jr., D. M.
Smith, G. M. Jones, M. J. Whelan,
Will Terry, Geo. Keese, H. Single-
ton, R. R. Taylor, W. Jacob, D. C.
Wise, L. P. Claiborn, W. Langen-
stine, Hollingsworth, Westburg,
Chapman, Lena Moseley, Cinnie
Preston, Justa Glass and Alice
Emmert. As no work can be of
greater interest than the proper
education of the child, we hope to
enroll fifty members is a short
time.

In regard to gardens, W. C. Wel-
born, agriculturist at the A & M
College of Texas says:

"My own idea has been that our
teachers should not at first attempt
to have gardens that are very pre-
tentious. I would keep them
small and use them almost entirely
for illustration. I would not pro-
pose to be able to produce better
crops than the farmer or gardeners
in the neighborhood. My idea has
been to use the best illustration
to be found in the neighborhood, and
largely as possible, and not expect
to provide in a school garden all
of the object lessons. I would not
try to grow a variety of things
whose success may be doubtful;
would rather grow fewer things
well known to be successful in that
special section, and try to reach
a reasonable success with most of
them."

"We teach geography, a closely
allied subject with no more object
lessons than globes and charts.
We could teach agriculture as well
by means of charts and pictures.
Fortunately our pupils in agricul-
ture have been brought up in the
midst of object lessons, and have
them constantly around them. By
making large use of these, and
having a small garden for illustra-
tion, I think we will meet the
greatest success."
